Shared Triumphs: Celebrating Your Success Through Our Journey

This year, our unwavering focus at AAA has centred on nurturing relationships with our valued customers and witnessing firsthand the remarkable progress of their livestock. As we visited the farms of our clients, the fruits of our distinctive approach to feeding, treatment, and genetic selection have become abundantly clear through the exceptional performance of their animals. To support this, we've gathered testimonials from these clients, each one a testament to the transformative impact our genetics have had on their herds.

Our journey at AAA has been one of global exploration, sourcing elite genetics from renowned destinations such as New Zealand, Canada, the USA, and Australia, all distinguished by their proven performance. Rooted in a commitment to excellence, we persistently strive to produce robust, high-performing females, many of

which have earned top accolades at prestigious Royal Shows throughout Australia.

Within our prized herd lie distinguished family lines like Prairie Hill Fancy Pants 93J, Notta-Pho Finish 54P, Notta Frontline 303x, Stardust, and Codiak Putnam. Our breeding philosophy revolves around crafting phenotypically appealing cattle tailored to the diverse requirements of our clientele.

In the domain of Speckle Park cattle, our emphasis lies in cultivating females with moderate frames ranging from 550 to 650 kg, and bulls spanning from 700 to 800 kg for smaller frames, with larger specimens extending from 700 kg to 850 kg for females and 800 to 1100 kg for bulls. Across all dimensions and genders, our breeding endeavors prioritise animals with deep bodies, generous length, ample muscle area, elevated intramuscular fat, and impeccable structural integrity,

coupled with robust fertility and milk production in our females.

In selecting bulls, we meticulously seek out traits such as a commanding head, smooth shoulders, robust testicular development, and, above all, an outstanding temperament.

At AAA, Theresa and I place high value on fostering enduring partnerships with our clients, grounded in transparency, integrity, and trust. Our commitment extends beyond mere transactions; we are steadfastly dedicated to nurturing the success of each client's

breeding program. Visitors to our farm in Kingaroy are invited to witness firsthand the tangible outcomes of our breeding philosophy. Our doors remain perpetually open, inviting you to share in our triumphs and lessons learned.

For inquiries about Speckle Park or to arrange a visit, please contact us on **0423 868 351**.

genetics guarantee

All embryos available at the sale are stored at the farm and will only be released after payment. A conception rate guarantee will be provided, with 1 pregnancy guaranteed for every 2 embryos for purchase, 1 pregnancy guaranteed for every 3 embryos, and 2 pregnancies guaranteed for every 4 embryos purchased. The impregnation process must be carried out by an approved technician, and pregnancy tests must be conducted at 60 days by the same technician. In case of any pregnancy failures, the seller will replace the embryos with similar genetics or value.

*Cow is an embryo
combination bought
from AAA Specklepark*

WGS H104 Thunderstruck FCF L1

Lagoon Specklepark

PAUL AND RACHEL LONG

Hunter | North Maitland NSW

So finally we had the chance to spend the afternoon with one of our great friends and someone who has had a huge influence on our stud being established, Denis Roberts from AAA Speckle Park. Anyone can sell-you embryos but the after sales service has been outstanding, we are having a quite few ales this afternoon and discussing genetics.

The stud game can be tough and sometimes you feel like you're on your own but Denis always calls when you need a pep up. I won't ever forget.

From established cows to first calving heifers, our results from AAA Speckle Park have been well above average.

Together we conquer, alone we fight to survive.

Future's there for those who plan for it.

Cow Photo is a AAA genetic combination AAA L15 /Extreme SPKNZ E27

Hollycott Specklepark

DAN, JULIE, ABBEY, RACHEL ROBERTS

We met Denis and his wife Theresa back in 2017 at the beginning of our journey into Speckle Park, and they have since become instrumental in the establishment of our stud, as well as great friends.

When we started out in SP we made the decision to focus on proven genetics that work, and to build a firm base of females with exceptional temperament and structure.

We identified AAA as having a programme whose priorities were aligned with our own, and as such we have a heavy influence of AAA genetics here at our stud.

We as customers owe our growing success to the people who have invested in us, and in particular our relationship with Denis which has been invaluable.

Denis has an exceptional eye for stock and is keenly invested in the progress and development of Speckle Park in Australia. His generosity and unbiased guidance have been greatly appreciated, as well as his ongoing customer support which has been exceptional.

They say you're only as good as the people around you, and for us this has definitely been the case.

STOCKLIVE ELITE

OPEN DAY: FRIDAY 7 JUNE – 9am to 3pm
AUCTION: SATURDAY 8 JUNE 2024

Inspection 9am • Auction commences 11am

At our upcoming **on-farm sale on 8 June**, we will be offering a selection of top-quality Speckle Park cattle for sale. This is an excellent opportunity to add outstanding genetics to your breeding program and take advantage of the exceptional traits that Speckle Park cattle are known for, including excellent marbling, docility, carcass and feed efficiency, plus fertility.

Leading up to the sale, we will be hosting an **open day on 7 June from 9am till 3pm**, where you can view the cattle available prior to purchase and ask any questions you may have about their genetics, performance, and suitability for your breeding program.

We are excited to showcase our herd and offer you the chance to purchase top-quality Speckle Park cattle at our on-farm sale on 7 June. Don't miss out on this unique opportunity to add exceptional genetics to your herd and enhance your breeding program.
